

THE MCCALL—1597 SQ. FT.

The McCall is a great starter home or the space needed for a couple wishing to downsize. The 1597 sq. ft. is enough to have a large living room, dining room, and a sunroom.

Warm up on a cool morning in the sunroom with a hot cup of coffee and have dinner guests for supper in the dining area. A walk-in closet in the master bedroom along with a private bath makes this home the perfect choice for a small family.
