Purchasing Bulletin

Bulletin #: 2017-01

Subject: NEW STANDARD FOR ROOF UNDERLAYMENT

Date: FEB. 23, 2017

EFFECTIVE IMMEDIATELY

The new standard for roof underlayment will be the following:

DUPONT™ TYVEK® PROTECH 120

DuPont™ Tyvek® is a synthetic roof underlayment that can be fastened with staples if the shingles are applied within 36 hours, and there is no concern of a major weather event with heavy rains and high winds.

If longer than 36 hours or inclement weather, the DuPont™ underlayment will be fastened with button cap staples or button cap nails.

If any questions about the above changes, please contact your Structural Modulars' sales representative.
